

# The Tough Shed

## is a cool shed!

Tough Sheds use **Techshield®**. It is a sheathing with a radiant barrier that saves your sweat and your stuff.

Blocks 97% of the radiant heat in the roof panel

Up to 30° Cooler!

### BE GREEN!

Renewable materials with low environmental impact

Made with low-emitting, safe resins

Materials from SFI managed forests

Much more comfortable!  
TechShield® makes it much brighter inside.

LP® SmartSide with SmartFinish  
Resists fungal decay and termite damage  
Natural look of cedar  
SmartFinish interior for a premium appearance

# The Tough Shed

## is made of premium materials!

Tough Sheds are built with engineered panels that are superior to traditional plywood and OSB used in many sheds. LP® Techshield® is used on the roof, and LP® SmartSide® with SmartFinish is used on the sides.

When you buy a shed made with LP® Building Products, it's a commitment to quality... and the environment! We believe in the quality and workmanship of a shed built with LP® Building Products. You are getting a shed with the best materials that will perform beautifully for many years. That's why you choose a shed built with LP® Building Products... you'll settle for nothing less than 100% premium inside and out.

### LP® SmartSide® Precision Series Panel with SmartFinish

- Resists fungal decay and termite damage
- Natural look of cedar
- SmartFinish interior for a premium appearance

### LP® Techshield® Radiant Barrier Sheathing

- A cooler, more comfortable shed, reducing the inside temperature by up to 30°

### The natural choice for building "green"

- Renewable materials with low environmental impact
- Made with low-emitting, safe resins
- All of the forests that LP manages in North America are SFI® certified. In addition, all of LP's North American mills use SFI® certified timber procurement processes.

See for yourself - ask to do the "heat gun test."
